

Your ShoreTel/Mitel Telephone System Roadmap

Do you know Mitel has chosen to manufacture discontinue the ShoreTel/Mitel Connect phone system?

While there is time, many of our customers are continually growing and investing in the Connect line of software and hardware, therefore we have been very successful providing information about Mitel's roadmap and options to keep the investment in the phone system.

Affiliated Communications takes the stress out of your decision-making so you can focus on your organization and not spend your time making communications and tech decisions.

We Cover all Your Communications and IT Needs

We want to help you in this transition as your budget and business load allows it and we have many alternatives for your telephone system. During our roadmap sessions, we will show you different options:

Purchase a new on-premises phone system

When security and control are at the top of your priority list, choose an on-premises phone system. Affiliated only works with the best names in the industry to provide you with high-quality on-site phone systems and services.

Upgrade your system to Mitel MiVoice Business premise PBX

We are a Gold Mitel vendor with more than 20 years of experience in the brand and the expertise to migrate your current system to the latest Mitel platform.

Move to the cloud

We work with 7 different cloud phone providers to give you the most flexible, scalable and cost-effective phone service in the cloud.

Adopt a hybrid approach

Since 1984, we've been building cloud and hybrid telephone solutions that combine cloud-based and premise-based equipment providing redundant and resilient communication solutions.
